

# NORSEMAN TOP DRIVE SERVICE LOOP COVERS

## NORSEMAN TOP DRIVE SERVICE LOOP COVERS. **MANAGE CABLES, PREVENT DAMAGE, AVOID DOWNTIME.**

Norseman's Top Drive Service Loop Covers are designed to wrap around your service loop and power cables, keeping them together to prevent hang-ups in the mast and keep cords organized. Constructed with a high-performance hook and loop fastener, they can be easily removed for inspection and maintenance of the service loop without removing the cover, reducing rig downtime.

Top Drive Service Loop covers keep service loops bound together preventing hang-ups in the mast or damage from harsh weather conditions. They reduce stress on cables in service loops which can help to lower maintenance costs. This helps to lower repair costs and downtime associated with service loop damage.

Their versatile construction allows for the loop cover to be opened, cables inspected and refastened without removing the cover. Most importantly they are easy to install and help organize power cables to keep them off the ground to protect from equipment and weather.

### Features

- Constructed with Arctic-Hyprene™ for cold weather climates or Reinforced Ballistic Nylon (1600 denier) for strength and durability.
- High-performance hook and loop fasteners used for longevity and improved adhesion.
- Locking carabiners help to securely hold the cover in place.
- Turned and sewn edges to prevent nylon fray.
- Arctic Hyprene™: Heavy-duty, flame resistant, abrasion, and tear-resistant, grey colour.
- Reinforced Ballistic Nylon: Heavy-duty, cut resistant, black colour.

## GEAR POINTS: Features specifically designed to ensure Norseman Gear outperforms on your next job-site.

### PROTECT

Prevents cables from snagging or becoming entangled in the mast.

### WITHSTAND

Hyprene fabric performs in extreme colds (-48°C). Reinforced ballistic nylon is extremely strong and durable.

### RESIST

Turned and sewn edges prevent nylon fray. High strength nylon rated at 10,000 lbs break strength.

### FIT

Easy to install. Custom sizes available.

### DELIVER

Increase the life of your cables by reducing the stress and potential for damage. Reduces downtime for maintenance

## GEAR INFORMATION:

Product	Product Number	Size	Material
Top Drive Service Loop Cover (AH55)	412285	55' Long	Norseman Arctic Hyprene™
Top Drive Service Loop Cover (AH75)	412286	75' Long	Norseman Arctic Hyprene™
Top Drive Service Loop Cover (BN55)	412283	55' Long	Heavy Duty Ballistic Nylon
Top Drive Service Loop Cover (BN75)	412284	75' Long	Heavy Duty Ballistic Nylon

### Specifications

- Arctic Hyprene™ fabric remains flexible beyond 55°F (-48°C) Fire-resistant (FR) fabric tested to Fed. Std.191A, Method 5903, and NFPA 701, Small Scale Test.
- Yellow tie-down webbing rated at 10,000 lb break strength.
- Stock sizes available in standard lengths from 55' to 75'.
- Custom sizes are available.
- Three 2" welded D-ring attachment points on each end secured and reinforced with webbing.
- 2" tie-down webbing straps approximately every 4' provides a secure closure system.
